therabidbanana@gmail.com

EDUCATION

Georgia Institute of Technology, Atlanta, GA   8/2005 - 5/2010
    Bachelor of Science, Computer Science
    Graduated with Honors, GPA: 3.16

SKILLS

Programming   C, Obj-C with Cocoa, Java, Python, Smalltalk, Ruby
Databases   Experience working with MongoDB, SQL, Redis
Web Development   XHTML, CSS, Javascript, Backbone.js

EXPERIENCE

Reachably, New York, NY: Lead Developer/CTO   6/2011 - Present
Building our site's HAL+JSON API built with Sinatra and authenticated with OAuth 2. Also working on our frontend Rails and Backbone.js code.

Orange Sparkle Ball, Atlanta, GA: Web Developer   8/2008 - 7/2011
Designing and implementing websites using PHP, CSS and XHTML. Building a Ruby based web framework alternative to Ruby on Rails.

Georgia Institute of Technology, School of Interactive Computing, Atlanta, GA:
    Undergraduate Research Assistant   5/2008 - 1/2010
Worked part-time as a research assistant focused on creating an easier-to-use home router.

OPEN SOURCE

Some of the open source projects I've developed:

tilt-jade gem (Ruby)
A gem for the asset pipeline to compile .jade templates (http://jade-lang.com/) into JST templates so that they can be used for client-side rendering in Rails.

eventbrite gem (Ruby)
A gem for interfacing with the Eventbrite API. Not actively maintained any more, as the company has an official gem.

orange framework (Ruby)
The goal was to build a Ruby-based CMS that was as simple as possible to use and customize. No longer maintained, but a fun experiment for learning exactly what's involved in building a framework.
